**FRANKIA TITAN 2026 ON A FIAT
DUCATO PLATFORM WITH AL-KO
LOW-FRAME**

TITAN

SMALL BUT SIGNIFICANT ENOUGH

WEIGHT AND SIZE SPECIFICATIONS

As a manufacturer, we specify a total mass of each vehicle, for which the vehicle is authorised for road use. This total mass must not be exceeded when driving. Our information on vehicle weights is therefore of great importance when selecting your motorhome and configuring optional equipment offered by the manufacturer. The following information gives you an overview of the legal framework for our weight specifications. You should read this information carefully before selecting and configuring your motorhome. If in doubt, please contact your dealer.

1. Technically permissible maximum laden mass

The technically permissible maximum laden mass is the total mass specified by the manufacturer, which your motorhome must not exceed when driving. You will find information on the technically permissible maximum laden mass of each vehicle in the Technical Data.

Please note that exceeding the technically permissible maximum laden mass is a misdemeanour in Germany and many other European countries and can be punished with a fine. As a driver, you are responsible for ensuring that the technically permissible maximum laden mass is not exceeded. You should therefore weigh your motorhome before every journey.

2. Mass in running order

The mass in running order for the vehicle version of your motorhome is entered in section 13 of the Certificate of Conformity (CoC) and indicates the unladen weight of the vehicle with standard equipment according to the manufacturer's specifications, including

- the mass of the body, the cab, the tyre repair kit and the tools,
- the fresh water tank filled to 100 % in driving mode (drive load according to the Technical Data),
- one aluminium gas cylinder filled to 100 %, with a weight of 16 kg,
- the fuel tank filled to 90 % including fuel,
- the AdBlue-Tank filled to 100 %,
- the mass of the driver, which (regardless of the actual weight) is rated at 75 kg.

Information on the mass in running order of the basic variant of the vehicle can be found in the Technical Data. Please note that the mass in running order indicates calculated values from the type approval procedure, which may deviate by up to +/- 5 % due to production. The occurrence of such production-related deviations of up to +/- 5 % is permitted by law, but may have an impact on the pay-mass of your motorhome.

Example:

Mass in running order according to Technical Data in kg	2,950.0
Production-related deviation of +/- 5 % in kg	147.5
Legally permissible deviation in mass in running order in kg	2,802.5 – 3,097.5

Information on the legally permissible deviations in the mass in running order can also be found in the Technical Data.

3. Mass of passengers

The mass of the passengers is based on the number of belt seats specified by the manufacturer rated at 75 kg per belt seat regardless of the actual weight of the passengers. The driver is not included in the calculation. The mass of the driver is already included in the mass in running order at 75 kg. If the manufacturer has provided four belt seats for your motorhome, the mass of the passengers is 225 kg (3×75 kg).

You can find information about the number of belt seats specified by the manufacturer in the technical data.

4. Actual mass | Packages and optional equipment

Actual mass of the vehicle means the mass in running order plus the mass of the optional equipment fitted to an individual vehicle by the manufacturer and is entered in section 13.2 of the Certificate of Conformity (CoC). This specification does not include optional equipment or other accessories that are fitted to the vehicle by a dealer, other third party or you personally after the vehicle has left the factory.

Please note that the actual mass of the vehicle is also a calculated value. Therefore, this value may also deviate from the actual value determined for your individual motorhome due to legally permissible production-related deviations in the mass in running order as part of the actual mass.

Please also refer to the technical data for weight information on the optional equipment offered by the manufacturer.

5. Pay-mass and minimum pay-mass

The pay-mass is the free mass of luggage and other accessories that your vehicle can transport without exceeding the technically permissible maximum laden mass. It is calculated by subtracting the mass in running order, the mass of the passengers and the mass of the optional equipment fitted by the manufacturer from the technically permissible maximum laden mass.

Example:

Technically permissible maximum laden mass	3,500 kg
Mass in running order	- 2,950 kg
Mass of passengers	- 225 kg (3*75 kg)
Mass of optional equipment	- 65 kg
Pay-mass	= 260 kg

As you can see from the example, the fitting of optional equipment leads to a reduction in the pay-mass. The maximum mass available for optional equipment can be found in the Technical Data.

The law stipulates a minimum pay-mass for motorhomes, which the vehicle must comply with. This minimum pay-mass may not be undercut during either configuration or production. According to the law, the minimum pay-mass is calculated as follows:

Minimum pay-mass in kg $\geq 10 \times (n + L)$

Where 'n' is the maximum number of passengers plus the driver and 'L' is the overall length of the vehicle in metres.

Example:

For a motorhome with four belt seats (including driver) and a length of seven metres, this results in a minimum pay-mass of 110 kg ($10 \times [4+7]$). Please keep in mind that legally permissible production-related deviations in the mass in running order could increase or reduce the pay-mass of your motorhome.

Example (as above):

Technically permissible maximum laden mass	3,500 kg
Mass in running order (+ 3 %)	- 3,038.5 kg
Mass of passengers	- 225 kg (3*75 kg)
Mass of optional packages/equipment	- 65 kg
Pay-mass	= 171.5 kg

To ensure that the occurrence of legally permissible production-related deviations in the mass in running order does not result in the configuration falling below the legally prescribed minimum pay-mass, we as the manufacturer have defined a maximum mass of optional equipment. In the calculation of this maximum mass of optional equipment, we have already taken into account empirical values for the production-related deviations in the mass in running order. The maximum mass of optional equipment can be found in the Technical Data. Also included in this value are the optional equipment features of country versions and special models that are not part of the standard equipment.

For the configuration of your motorhome, this means that you cannot continue or finalise the configuration if the maximum mass of optional equipment is exceeded. In this case, you have the option of deselecting optional equipment or belt seats or ordering the vehicle with an increase in the technically permissible maximum laden mass.

Although we as the manufacturer endeavour to minimise the occurrence of production-related deviations through the (technical) optimisation of our production, the weighing of your motorhome at the end of the line may exceptionally show that the vehicle does not comply with the minimum pay-mass, despite the limitation of the maximum mass of optional equipment. In such a case, we may not deliver your motorhome unless compliance with the minimum pay-mass is guaranteed by removing optional equipment or belt seats or by increasing the technically permissible maximum laden mass of the vehicle.

The **total vehicle length** corresponds to the measurement between the outermost point of the front spoiler and the outermost point of the rear panel (without trailer coupling).

The **total vehicle width** corresponds to the measurement between the outer sides of the exterior walls on both the driver and passenger side without outer mirrors and without an awning.

The **total vehicle height** is the measurement between the roadway and the highest point of the unladen vehicle (without antenna) and may vary with installations and superstructures (e.g. skylights, SAT or air conditioning systems).

The **bed measurements** specified are external measurements. The measurements of the mattresses supplied may differ.

**FOR EVERYONE WHO
WANTS TO ENJOY FREEDOM
AND INDEPENDENCE
ON A FIAT DUCATO PLATFORM!**

FLEXIBLE LUXURY

Let FRANKIA TITAN show you what freedom feels like: The elegant A-Class lets you choose what makes you happy. What's more, depending on your individual wishes and needs, you can choose from a wide range of optional luxury packages. This enables discerning travellers like you to enter the luxury segment at a relatively affordable price. Naturally – and very FRANKIA – everything is based on the highest standards of design, quality and comfort.

Fiat driving at its finest: Drive in style with the FRANKIA TITAN!
The car-like exterior design exudes exclusivity and understatement.

DEVELOPMENT PARTNERS
FOR OVER 39 YEARS

Versatility and individuality on a Fiat Ducato platform with an AL-KO low-frame: FRANKIA TITAN.

A STRONG PARTNERSHIP

What makes Fiat and FRANKIA such a perfect team? Whether one-of-a-kind double floor or maximum driving pleasure: The powerful Fiat Ducato with an AL-KO low-frame is the perfect basis for us to create exceptional motorhomes that satisfy your unique needs and wishes.

INDIVIDUALISTIC

Trends come and go. Real style is timeless and shows personality. FRANKIA TITAN understands this. Sophisticated materials are used inside the vehicle to create pure elegance, fresh contrasts and light-flooded spaces for your enjoyment. The stepless interior in this luxury liner boasts 2.03 m of headroom for unique, loft-like charm.

CHARISMATIC

Why stay and travel in tight quarters when maximum comfort awaits you? The FRANKIA I 840 QD TITAN is full of space and luxury. The large L-shaped seating group and the 1.60 m wide queen-size bed make your living space feel like a suite.

INDULGENT

Holidays mean freedom. The freedom to do anything or nothing at all. You decide where your journey will take you – even in the kitchen: FRANKIA's sophisticated MaxiFlex kitchen gives you the freedom to cook your favourite cuisine with ample space, flexible expansion options and all kinds of practical solutions.

PERFECT TIME

In the FRANKIA TITAN you can turn night into day whenever you like – or vice versa. The bedroom in your luxury liner features high-quality materials and has plenty of light and space for you to relax and take a break from it all. And it's up to you how you want to sleep: in separate beds, in the extra-wide queen-size bed or in the power drop-down bed.

GREAT FREEDOM

FRANKIA's spa-like bathroom offers you plenty of space and luxurious comfort, just like you're used to at home. Elegant surfaces, high-quality materials, flexible storage space and innovative details make this possible.

IMPRESSIVE PERFORMANCE

Highlights of the FRANKIA TITAN

The FRANKIA TITAN is the all-rounder among the luxury liners on a Fiat Ducato platform. Choose from five integrated floor plans with a length of 8 to 8.5 metres. Whether power drop-down bed, separate beds or extra-wide queen-size bed – it's up to you how you want to live and sleep.

More ground-breaking ideas – thanks to strong partners

Never rest, continue to improve, create something special – this has always been our aim with FRANKIA models on a Fiat Ducato platform with an AL-KO low frame. 39 years ago, today and tomorrow.

Way more storage space

Extra-large rear storage compartment with a height of 1.24 m, FRANKIA double floor (stepless and heated) with a continuous height of 35 cm and many clever storage solutions in the interior

More standard features for maximum comfort

Fully insulated Thermo Guard Plus wall structure with 11-year warranty, Alde Compact hot water heating system, up to 250 l XL fresh water tank

More driving pleasure with Fiat Ducato

All inclusive: new cockpit, up to 90 l diesel tank, automatic gearbox, eco-friendly AdBlue Technology and much more

More independence with the self-sufficiency package

Optional in the FRANKIA TITAN: self-sufficiency package with 320 Ah battery, 3x 110 W solar panels, battery booster, etc.

True greatness: FRANKIA TITAN I 790 GDW

Luxury liner with a length of nearly 8 m, 5.5 t total weight standard. Extra-large washroom, face-to-face seating, large MaxiFlex galley kitchen and much more.

Show character with unique style

The FRANKIA TITAN has personality – and it shows it, too: with its bold and dynamic exterior design and elegant interior with exclusive leather upholstery (optional).

* Please refer to page 30 for important information regarding the Technical Data.

UNIQUE TECHNOLOGY

180 hp engine, automatic gearbox, cruise control

Fiat Ducato 180 Multijet power: automatic gearbox – maximum driving comfort and maximum utilisation of torque (+5%); also eco-friendlier thanks to standard AdBlue engine (greater efficiency and lower emissions)

3x 110 W high-performance solar power system (option)

Now with even more power optional – even with little sunshine

1,700 W sine wave inverter (option)

Use 230 V consumers without restrictions; integrated mains priority circuit

CAC smart converter charger

Ensures that your LiFePO4 battery is always charged quickly and safely

320 Ah lithium battery

Independence, maximum-capacity LiFePO4 technology (optional)

Battery booster

Quick charging of the on-board batteries – even on short trips

Aluminium rims

Stylish rims for an even bolder appearance (optional)

5.5 metre awning by THULE

Shade on sunny days and protection on rainy days – optional with the FRANKIA TITAN

Battery computer/ solar remote display

Always in view: current power consumption and battery charge (optional)

Satellite system

Optional with the FRANKIA TITAN: automatic HD satellite antenna

FRANKIA Thermo Guard Plus

Innovative wall and floor structure with a wall thickness of 34 mm and 11-year water ingress warranty (optional)

* Please refer to page 30 for important information regarding the Technical Data.

The image shows the interior of a motorhome. The upper half features wooden cabinetry with integrated LED lighting. Below, there's a long brown leather bench with patterned cushions. In the foreground, a table holds a cake and drinks. Two large leather seats with white stitching are visible on the right. A white text box with a blue header is on the right side.

GREAT PATHFINDER

The TITAN I 790 GDW is truly special, even among luxury motorhomes: You've never experienced so much freedom in the interior – thanks to face-to-face seating with lengthwise benches combined with a MaxiFlex galley kitchen. Another GDW highlight: the even larger, luxury wellness bathroom.

SPECIAL UPGRADE

Why settle for less when you can have it all? The FRANKIA TITAN is fully equipped. It already has everything you need to travel self-sufficiently in style in the standard equipment package.

Standard with FRANKIA: attention to detail – elegant accents around the queen-size bed

AQUAMARINE

*** Important information regarding the Technical Data**

1. Technically permissible maximum laden mass (kg)

The technically permissible maximum laden mass is the total mass specified by the manufacturer that the vehicle must not exceed when driving.

2. Mass in running order (kg)

The mass in running order indicates the unladen weight of the vehicle with standard equipment according to the manufacturer's specifications. It includes the mass of the body, the cab, the tyre repair kit and the tools, the fresh water tank filled to 100 % in driving mode (drive load according to the Technical Data), one aluminium gas cylinder filled to 100 % with a weight of 16 kg, the fuel tank filled to 90 % including fuel, the AdBlue-Tank filled to 100 % and the mass of the driver, which (regardless of the actual weight) is rated at 75 kg. This calculated value is subject to legally permissible production-related deviations of up to +/-5 % (see addition in brackets), which may affect the pay-mass of your motorhome and therefore also the mass of the optional equipment. Please note that the specified value is the mass in running order of the basic version of the vehicle shown. Information on the mass in running order for the vehicle version of your motorhome can be found after delivery of the vehicle in section 13 of the Certificate of Conformity (CoC).

3. Standard belt seats

The mass of the passengers is based on of the number of belt seats specified by the manufacturer rated at 75 kg per belt. The mass of the driver, which has already been included in the mass in running order, must be deducted. For a vehicle with four belt seats, the mass of the passengers is 225 kg (3*75 kg).

4. Maximum mass of optional equipment

The maximum mass of optional equipment is a value calculated by the manufacturer to limit the mass for optional equipment that can be ordered ex works. This is to ensure that the vehicle complies with the legally prescribed minimum pay-mass. If you exceed the maximum mass of optional equipment during configuration, you can only continue or finalise the configuration if you deselect optional equipment or belt seats or order the vehicle with an increase in the technically permissible maximum laden mass. You can find detailed information on the weight specifications on page 2.

5. Fresh water tank in driving mode (drive load)

Please note that the filling of the fresh water tank is considerably reduced when driving. If the pay-mass of your motorhome is sufficient, the filling of fresh water tank can be increased.
