 FRANKIA

A-CLASS AND COACHBUILT 2026
FRANKIA EDITION

TOGE
THER

SMALL BUT SIGNIFICANT ENOUGH

WEIGHT AND SIZE SPECIFICATIONS

As a manufacturer, we specify a total mass of each vehicle, for which the vehicle is authorised for road use. This total mass must not be exceeded when driving. Our information on vehicle weights is therefore of great importance when selecting your motorhome and configuring optional equipment offered by the manufacturer. The following information gives you an overview of the legal framework for our weight specifications. You should read this information carefully before selecting and configuring your motorhome. If in doubt, please contact your dealer.

1. Technically permissible maximum laden mass

The technically permissible maximum laden mass is the total mass specified by the manufacturer, which your motorhome must not exceed when driving. You will find information on the technically permissible maximum laden mass of each vehicle in the Technical Data.

Please note that exceeding the technically permissible maximum laden mass is a misdemeanour in Germany and many other European countries and can be punished with a fine. As a driver, you are responsible for ensuring that the technically permissible maximum laden mass is not exceeded. You should therefore weigh your motorhome before every journey.

2. Mass in running order

The mass in running order for the vehicle version of your motorhome is entered in section 13 of the Certificate of Conformity (CoC) and indicates the unladen weight of the vehicle with standard equipment according to the manufacturer's specifications, including

- the mass of the body, the cab, the tyre repair kit and the tools,
- the fresh water tank filled to 100 % in driving mode (drive load according to the Technical Data),
- one aluminium gas cylinder filled to 100 %, with a weight of 16 kg,
- the fuel tank filled to 90 % including fuel,
- the AdBlue-Tank filled to 100 %,
- the mass of the driver, which (regardless of the actual weight) is rated at 75 kg.

Information on the mass in running order of the basic variant of the vehicle can be found in the Technical Data. Please note that the mass in running order indicates calculated values from the type approval procedure, which may deviate by up to $\pm 5\%$ due to production. The occurrence of such production-related deviations of up to $\pm 5\%$ is permitted by law, but may have an impact on the pay-mass of your motorhome.

Example:

Mass in running order according to Technical Data in kg	2,950.0
Production-related deviation of $\pm 5\%$ in kg	147.5
Legally permissible deviation in mass in running order in kg	2,802.5 – 3,097.5

Information on the legally permissible deviations in the mass in running order can also be found in the Technical Data.

3. Mass of passengers

The mass of the passengers is based on the number of belt seats specified by the manufacturer rated at 75 kg per belt seat regardless of the actual weight of the passengers. The driver is not included in the calculation. The mass of the driver is already included in the mass in running order at 75 kg. If the manufacturer has provided four belt seats for your motorhome, the mass of the passengers is 225 kg (3×75 kg).

You can find information about the number of belt seats specified by the manufacturer in the technical data.

4. Actual mass | Packages and optional equipment

Actual mass of the vehicle means the mass in running order plus the mass of the optional equipment fitted to an individual vehicle by the manufacturer and is entered in section 13.2 of the Certificate of Conformity (CoC). This specification does not include optional equipment or other accessories that are fitted to the vehicle by a dealer, other third party or you personally after the vehicle has left the factory.

Please note that the actual mass of the vehicle is also a calculated value. Therefore, this value may also deviate from the actual value determined for your individual motorhome due to legally permissible production-related deviations in the mass in running order as part of the actual mass.

Please also refer to the technical data for weight information on the optional equipment offered by the manufacturer.

5. Pay-mass and minimum pay-mass

The pay-mass is the free mass of luggage and other accessories that your vehicle can transport without exceeding the technically permissible maximum laden mass. It is calculated by subtracting the mass in running order, the mass of the passengers and the mass of the optional equipment fitted by the manufacturer from the technically permissible maximum laden mass.

Example:

Technically permissible maximum laden mass	3,500 kg
Mass in running order	- 2,950 kg
Mass of passengers	- 225 kg (3*75 kg)
Mass of optional equipment	- 65 kg
Pay-mass	= 260 kg

As you can see from the example, the fitting of optional equipment leads to a reduction in the pay-mass. The maximum mass available for optional equipment can be found in the Technical Data.

The law stipulates a minimum pay-mass for motorhomes, which the vehicle must comply with. This minimum pay-mass may not be undercut during either configuration or production. According to the law, the minimum pay-mass is calculated as follows:

Minimum pay-mass in kg $\geq 10 \times (n + L)$

Where 'n' is the maximum number of passengers plus the driver and 'L' is the overall length of the vehicle in metres.

Example:

For a motorhome with four belt seats (including driver) and a length of seven metres, this results in a minimum pay-mass of 110 kg ($10 \times [4 + 7]$). Please keep in mind that legally permissible production-related deviations in the mass in running order could increase or reduce the pay-mass of your motorhome.

Example (as above):

Technically permissible maximum laden mass	3,500 kg
Mass in running order (+ 3 %)	- 3,038.5 kg
Mass of passengers	- 225 kg (3*75 kg)
Mass of optional packages/equipment	- 65 kg
Pay-mass	= 171.5 kg

To ensure that the occurrence of legally permissible production-related deviations in the mass in running order does not result in the configuration falling below the legally prescribed minimum pay-mass, we as the manufacturer have defined a maximum mass of optional equipment. In the calculation of this maximum mass of optional equipment, we have already taken into account empirical values for the production-related deviations in the mass in running order. The maximum mass of optional equipment can be found in the Technical Data. Also included in this value are the optional equipment features of country versions and special models that are not part of the standard equipment.

For the configuration of your motorhome, this means that you cannot continue or finalise the configuration if the maximum mass of optional equipment is exceeded. In this case, you have the option of deselecting optional equipment or belt seats or ordering the vehicle with an increase in the technically permissible maximum laden mass.

Although we as the manufacturer endeavour to minimise the occurrence of production-related deviations through the (technical) optimisation of our production, the weighing of your motorhome at the end of the line may exceptionally show that the vehicle does not comply with the minimum pay-mass, despite the limitation of the maximum mass of optional equipment. In such a case, we may not deliver your motorhome unless compliance with the minimum pay-mass is guaranteed by removing optional equipment or belt seats or by increasing the technically permissible maximum laden mass of the vehicle.

The **total vehicle length** corresponds to the measurement between the outermost point of the front spoiler and the outermost point of the rear panel (without trailer coupling).

The **total vehicle width** corresponds to the measurement between the outer sides of the exterior walls on both the driver and passenger side without outer mirrors and without an awning.

The **total vehicle height** is the measurement between the roadway and the highest point of the unladen vehicle (without antenna) and may vary with installations and superstructures (e.g. skylights, SAT or air conditioning systems).

The **bed measurements** specified are external measurements. The measurements of the mattresses supplied may differ.

EXPERIENCE MORE TOGETHER

The TOGETHER edition pays tribute to FRANKIA's 65-year success story. This 4.5 t model revives the legendary round seating group – whether as a Coachbuilt or A-Class model – and redefines design, quality and comfort. Additional features: TOGETHER comes packed with upgrades and an impressive range of additional standard features.

**FRANKIA IS
CELEBRATING ITS
ANNIVERSARY –
WITH THE
TOGETHER**
EDITION

EXPERIENCE SOMETHING NEW TOGETHER

The first models featuring the legendary FRANKIA round seating group were introduced in the 1980s and are still popular today. And it's no wonder because virtually no other layout brings the feeling of "togetherness" into focus quite like it. Now FRANKIA has completely reimagined the round seating group: with FRANKIA TOGETHER. That's because this 4 t motorhome elevates round seating group models – like the classic Coachbuilt featured here – to an entirely new level thanks to its extraordinary design, top-of-the-line standard equipment package and a revolution in comfort and convenience.

DISCOVER THE WORLD TOGETHER

While the TOGETHER edition truly shines in terms of space, size and openness – the new TOGETHER A-Class goes even further: with even more freedom of movement, openness and light – especially in the front section of the vehicle – and a power drop-down bed for sleeping lengthwise. No matter the model, despite its compact dimensions, the edition offers maximum freedom of movement.

TOGETHER IS REIMAGINING THE ROUND SEATING GROUP!

TOGETHER offers world-class comfort: Newly developed upholstery and higher backrests featuring ergonomic tilt adjustment offer maximum comfort while seated. Piping provides exceptional stability. Perfect for relaxing: Full use of the corners offers travellers more space for sitting or sleeping. Even better: All upholstery is made from premium Rohleder® fabric, and all four headrests feature the TOGETHER logo (driver's cab and seating group).

MIX AND MATCH

FRANKIA offers an exclusive mix-and-match concept in the interior: Two wood finishes (light/dark) can be combined with trendy styles, including animal print pillows and designer floors with a concrete look. All upholstery is made from premium Rohleder® fabric, and all four headrests feature the TOGETHER logo (driver's cab and seating group).

Spacious FRANKIA bathroom with mirrored cabinet, sink with lower cabinet and ceramic toilet with replaceable cassette.

MaxiFlex kitchen with 160 l refrigerator and freezer compartment that open on both sides, plus an oven

RELAX MORE TOGETHER

What's it like to sleep in the TOGETHER edition? Simply dreamy! After all, the FRANKIA drop-down bed is truly unique – especially for those who prefer to sleep lengthwise. A length of 2 m, a width of 1.93 m and plenty of extra room come together here to offer you a pleasant night's sleep. Heki skylights, dimmable ambient lighting and reading lights set the perfect mood.

FRANKIA TOGETHER HIGHLIGHTS

TOGETHER, the sophisticated style icon

A motorhome that delivers – and always makes a positive impression: TOGETHER's exterior boasts a fresh design with exciting accents to match the edition.

TOGETHER, the entertainer

Get ready for pure entertainment – with the tilting and swivelling 32" LED TV, which can simply be locked when driving or not in use.

TOGETHER, the revolutionary

The round seating group in the TOGETHER edition has been completely reimaged and now offers more comfort than ever: thanks to brand new upholstery and even more room for sitting and sleeping.

TOGETHER, the amazing combination

When it comes to style, TOGETHER leaves plenty of freedom for creativity and a personal touch. Take advantage of the mix-and-match styles with premium Rohleder® fabrics included.

TOGETHER, the independent adventurer

TOGETHER loves its freedom! And this is why the edition offers so many extras standard – like the self-sufficiency package with a 320 Ah battery and 2 x 110 W solar panels.

TOGETHER, the only one of its kind

TOGETHER is always looking for ways to offer you ideal comfort with unique details like the full-height extra-large wardrobe, an oven and a 160 l refrigerator with a freezer that can be opened on both sides!

TOGETHER, the allrounder

TOGETHER offers more than meets the eye: Twin beds with 2 m length – both in the Coachbuilt model and in the drop-down bed in the A-Class. Always on board: the luxurious, spacious FRANKIA bathroom and MaxiFlex kitchen.

* Important information regarding the Technical Data

1. Technically permissible maximum laden mass (kg)

The technically permissible maximum laden mass is the total mass specified by the manufacturer that the vehicle must not exceed when driving.

2. Mass in running order (kg)

The mass in running order indicates the unladen weight of the vehicle with standard equipment according to the manufacturer's specifications. It includes the mass of the body, the cab, the tyre repair kit and the tools, the fresh water tank filled to 100 % in driving mode (drive load according to the Technical Data), one aluminium gas cylinder filled to 100 % with a weight of 16 kg, the fuel tank filled to 90 % including fuel, the AdBlue-Tank filled to 100 % and the mass of the driver, which (regardless of the actual weight) is rated at 75 kg. This calculated value is subject to legally permissible production-related deviations of up to +/-5 % (see addition in brackets), which may affect the pay-mass of your motorhome and therefore also the mass of the optional equipment. Please note that the specified value is the mass in running order of the basic version of the vehicle shown. Information on the mass in running order for the vehicle version of your motorhome can be found after delivery of the vehicle in section 13 of the Certificate of Conformity (CoC).

3. Standard belt seats

The mass of the passengers is based on the number of belt seats specified by the manufacturer rated at 75 kg per belt. The mass of the driver, which has already been included in the mass in running order, must be deducted. For a vehicle with four belt seats, the mass of the passengers is 225 kg (3*75 kg).

4. Maximum mass of optional equipment

The maximum mass of optional equipment is a value calculated by the manufacturer to limit the mass for optional equipment that can be ordered ex works. This is to ensure that the vehicle complies with the legally prescribed minimum pay-mass. If you exceed the maximum mass of optional equipment during configuration, you can only continue or finalise the configuration if you deselect optional equipment or belt seats or order the vehicle with an increase in the technically permissible maximum laden mass. You can find detailed information on the weight specifications on page 2.

5. Fresh water tank in driving mode (drive load)

Please note that the filling of the fresh water tank is considerably reduced when driving. If the pay-mass of your motorhome is sufficient, the filling of the fresh water tank can be increased.
