

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

Ready for the next level? **FRANKIA NOCTRA**

The beginning of a new generation of FRANKIA luxury motorhomes: with the NOCTRA Cruiser 7.6 L, the renowned manufacturer is entering a new era and once again setting benchmarks in the industry.

2025 is a special year for FRANKIA. The long-standing manufacturer and industry pioneer is celebrating its 65th anniversary while simultaneously setting a completely new course for the future. With the extraordinary NOCTRA model range, FRANKIA is opening an entirely new chapter and once again setting standards in design, comfort, and quality in the luxury segment. The innovative semi-integrated NOCTRA Cruiser 7.6 L will celebrate its world premiere from August 29 to September 7, 2025, at the Caravan Salon in Düsseldorf (Hall 17).

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

Already the exterior design of the NOCTRA sets new standards: with modern lines and a truly distinctive “statement” rear ...

... featuring its striking appearance, continuous BridgeLight, and highlights such as an optional panoramic rear window.

Here, size plays a major role: the interior of the NOCTRA impresses with fantastic spaciousness and a fresh new design.

“The semi-integrated NOCTRA Cruiser 7.6 L does more than just open a new chapter – this revolutionary 4.5-tonner is the first model of our next generation. With it, we are embarking on a new era. Based on the Mercedes-Benz Sprinter and Fiat Ducato, we worked together as a team for more than two years to create a companion on the road that aspires to the next level in every respect – especially in design, comfort, and quality. To achieve this, we started from scratch: rethinking everything, developing a completely new concept, and optimizing proven solutions – right down to the smallest detail.”

Konstantin Döhler, Managing Director

FRANKIA NOCTRA – DESIGN R|EVOLUTION

From the very first glance, the exterior design of the NOCTRA sets new benchmarks: modern lines, a surrounding frame, and a harmonious connection between front and rear create a revolutionary look. The rear makes a bold “design statement” with an entirely new striking appearance, continuous BridgeLight, and features such as a unique optional panoramic rear window. Travelers can choose between two luxurious exterior designs. Inside, a brand-new design concept awaits: two wood finishes (Visby and Zelos) combined with clean anthracite surfaces, along with two style colors – a deep green “Forest” or a subtle beige “Dune.” Matte surfaces shape the contemporary ambiance, while the special lighting concept ensures perfect illumination and emphasizes highlights with precision.

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

Storage space in the NOCTRA? FRANKIA takes luxury seriously here as well. In the interior, the double floor, and the rear garage, there is plenty of it.

A practical feature to keep everything in place: the ribbed floor in the NOCTRA's rear garage.

The bright lighting in the rear garage makes loading and unloading especially easy, both day and night.

» "Next level comfort' is one of the most important themes of the FRANKIA NOCTRA. Whether it's the feeling of space, storage, or lighting – from the big picture down to the smallest detail, we have reimagined solutions to make travel as comfortable as possible. A particular highlight of comfort is certainly the completely redesigned double-floor concept with an enormous pass-through compartment and pull-outs. Travelers also benefit from the new hatch concept, which allows individual accesses to be opened effortlessly with a simple touch. Existing handles are recessed and can be opened single-handedly. All this, and much more, stands for the next level of comfort that defines FRANKIA's future."

Ansgar Nonhoff, Head of Design Engineering

FRANKIA NOCTRA – COMFORT R|EVOLUTION

Part of this comfort revolution is also the spacious NOCTRA rear garage, which is easily accessible through two large side doors. A new order applies here as well: robust ribbed metal is used as durable floor protection and can be supplemented with a non-slip mat. Additional compartments add more structure and storage to the garage – while bright lighting makes loading and unloading especially easy, day or night.

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

Highlight of the new double-floor concept: the large, continuous storage compartment with optional touch-opening and pull-out system.

All NOCTRA's technical features are now neatly arranged in the double floor – and, of course, easily accessible.

The water supply also now has its fixed place. New in the NOCTRA: greywater drainage with an electric valve.

FRANKIA NOCTRA REVOLUTIONIZES THE (DOUBLE) FLOOR

FRANKIA was one of the first manufacturers to introduce the double floor and is now the one to launch its next generation: with a visionary concept and a completely rethought structure that benefits every traveler on a daily basis – with more organization, more space, and improved access. Every area – technology, heating, storage, water – has its clearly defined place. Highlight: the exceptionally large and continuous storage compartment, which can be equipped with a pull-out system on both sides.

Smart details of the next generation: a completely new design layout, greywater drainage with electric valve, optimized floor hatches and access points to all relevant positions in the double floor. The walking floor in the interior has also been innovatively redesigned and is built in sandwich construction – for even better insulation and stability.

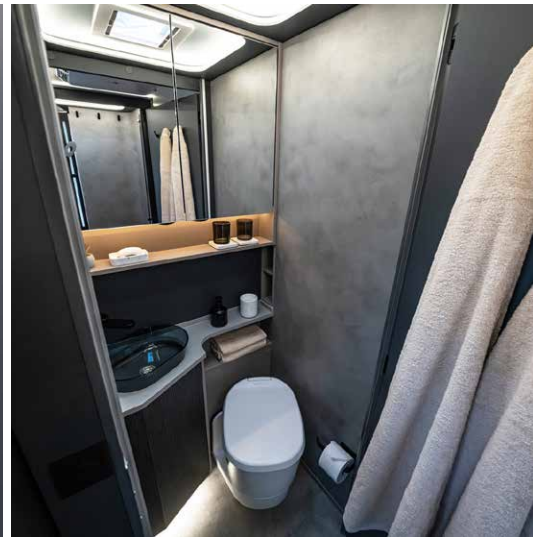

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

A unique view and true inside-out feeling are offered by the optional panoramic window above the longitudinal beds.

Access to the extended single beds is made even easier thanks to a newly developed step system with rails.

The NOCTRA bathroom has been completely redesigned – with an all-new design and many clever details.

FRANKIA NOCTRA REVOLUTIONIZES THE INTERIOR

This is unique: for the first time, travelers in the FRANKIA NOCTRA can enjoy a huge panoramic rear window that brings the perfect inside-out feeling to life in the NOCTRA and offers a stunning view of nature – even from the single beds. Access to the separate single beds is made even easier with a newly developed step system with rails. Typical for FRANKIA: the steps can also be used as storage space, and the large illuminated wardrobes under the beds are always easily accessible.

EVOLUTION! THE NEXT GENERATION OF THE FRANKIA BATHROOM

When it comes to bathrooms, FRANKIA has always been a pioneer and continues to shape its future today. Originally invented by FRANKIA, it has since become established throughout the market. Now, FRANKIA has redesigned it exclusively for the NOCTRA, equipping it with many clever details and an entirely new design. The design language features harmonious curves, elegant wall design and lighting, as well as modern black fittings. Special comfort features create the perfect loft-style feeling: a floor-level shower for more space and height, a large rain shower head, a washbasin made of high-quality mineral composite, and the new mirrored cabinet. Travelers can also choose between three toilet systems.

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

The NOCTRA kitchen is designed with a monolithic style – featuring a very deep, spacious kitchen unit with plenty of storage.

A highlight in the FRANKIA NOCTRA kitchen is certainly the full-height pull-out pantry.

Practical extra storage: additional compartments are located above and below the refrigerator with freezer.

NEWLY DEVELOPED KITCHEN – INNOVATION IN EVERY DETAIL

The FRANKIA NOCTRA kitchen also sets new standards in terms of equipment and design. Modern lighting provides a pleasant atmosphere and perfect illumination. The high-quality, monolithic kitchen block impresses with generous storage and depth, a central locking system for all drawers, as well as an elegant designer faucet. The worktop made of premium mineral composite is enhanced by a surrounding protective edge and a practical extension – ideal for anyone who loves to cook with plenty of space.

Another highlight is the full-height pull-out pantry with integrated power socket. For maximum freshness on the road, the compressor refrigerator features an optimized access height. An additional drawer beneath the freezer provides even more storage space for supplies.

WORLD PREMIERE OF A NEW GENERATION OF LUXURY MOTORHOMES

The large seating area is available either in cream with the style color Dune or in anthracite with the style color Forest.

Perfect for families: the longitudinal beds are complemented by an electric drop-down bed that completely "disappears" into the ceiling.

Smart features: illuminated handle in the new body door as well as Coming-Home and Leaving-Home functions.

NEXT-LEVEL LIVING: MORE SPACE, MORE COMFORT, MORE EXPERIENCE

The living area in the NOCTRA has been designed with the future in mind to take the travel experience to a new level. The spacious face-to-face seating group creates openness and offers noticeably more room to feel at home – even for four people. Ideal for fellow travelers: an electric drop-down bed above the seating group that, thanks to a partial roof elevation, disappears completely into the ceiling while maintaining the full interior height. A sophisticated lighting concept with dimmable ambient lighting ensures a pleasant atmosphere. Plenty of natural light enters the living space through the front Heki roof window, creating a bright and inviting environment. Smart features such as an illuminated handle on the new body door as well as the Coming-Home and Leaving-Home functions add further highlights.
